Washington .-- Following is the text the Austrian government by Secretary Lansing:

Department of State, Washington, D. C., December 6, 1915. Secretary of State to Ambassador

Penfield. Please deliver a note to the minister of foreign affairs textually as

follows "Reliable information obtained from American and other survivors who were passengers on the steamship Ancona shows that, on November 7, a submarine flying the Austro-Hungarian flag fired a solid shot through the steamship; that thereupon Ancona attempted to escape, but being overhauled by the submarine she topped; that after a brief period and before the crew and passengers were marine fired a number of shells at

the vessel and finally torpedoed and sank her while there were yet many persons on board; and that by gun fire and foundering of the vessel a large number of persons lost their lives or were seriously injured, among whom were citizens of the United States

"The Austro-Hungarian government has been advised, through the correspondence which has passed between the United States and Germany, of the attitude of the government of the United States as to the use of submarines in attacking vessels of cotmerce and the acquiescence of Germany in that attitude, yet with full Hungarian government of the views the government of the United States as expressed in no uncertain terms to the ally of Austra-Hunry, the commander of the submarine which attacked the Ancona failed to ut in a place of safety the crew and passengers of the vessel which they ourposed to destroy because, it is presumed, of the impossibility of tak-

ing it into port as a prize of war. The government of the United States considers that the commander violated the principles of international law and of humanity by shelling and torpedoing the Ancona before persons on board had been put in a place of safety or even given sufficient time to leave the vessel. The conduct of the commander can only be characterized as wanton slaughter of defenseless noncombatants, since, at the time when the vessel was shelled and torpedoed, she was not, it appears, re-

isting or attempting to escape "The government of the United States is forced therefore to conclude either that the commander of the submarine acted in violation of his instructions or that the imperial and royal government failed to bone instructions to the commanders of its ubmarines in accordance with the mas. law of nations and the principles of

The government of the United States is unwilling to believe the latter alternative and to credit the Austro-Hungarian government with an intention to permit its submarines to destroy the lives of helpless men, women and children. It prefers to submarine committed this outrage without authority and contrary to the eneral or special instructions which

he had received. "As the good relations of the two countries must rest upon a common regard for law and humanity, the govrnment of the United States cannot be expected to do otherwise than to government denounce the sinking of the Ancona as an illegal and indefensthe act; that the officer who per petrated the deed must be punished and that reparation by the payment of an indomnity be made for the cititens of the United States who were

allied or injured by the attack on the States expects that the Austro-Hungarian government, appreciating the gravity of the case, will accede to its demand promptly, and it rests its expectation on the belief that the Austro-Hungarian government will not sanction or defend an act which is condemned by the world as inhuman al civilized nations, and which has

caused the death of innocent Ameri-(Signed) "LANSING."

NOTE TO AUSTRIA WESTERN CANADA'S NEAR ULTIMATUM WONDERFUL YIELD

Wheat Yields Reports Extraordinarily Heavy.

When one hears of individual wheat yields of thirty-five to forty bushels per acre, there is considerable increthree and four and five hundred square miles in area, of upwards of fifty and he says: some as high as sixty-five bushels per acre are reported, one is led to put his ear to the ground to listen for furof the note dispatched last week to ther rumblings. The writer having of apparatus by which it could be heard of these wonderful yields made a trip through the provinces of Manitoba, Saskatchewan and Alberta, to ascertain first hand their truthfulness. "At once the beating It was remarkable to discover that Dame Rumor was no rumore; after all, that modesty was her mantle, that all that had been said of these yields was true, and that yields of over seventy bushels per acre were told of. These were so high that the truthfulsuch there were, and not in one incality but scattered in places hun- other sound. dreds of miles apart. Leaving these out altogether, there were large areas bushels per acre, which in all common sense ought to satisfy most peo-One hundred and thirty threshers in Alberta have made their returns to the local government as required by an act of the Legislature, immense was the yield that official verification was required before giving it out to the public. Sitting in the smoking compartment of a day coach. where on passing through a farming community, there may be gathered the gossipy yarns of the neighborhood, one hears also a lot of news. Just now, the sole topic is that of the crops. A man with more or less of a hirsute appendage, smock, clothes knowledge on the part of the Austro- and hands giving the appearance of one working in the field, was asked as to the crops. He had got on at Warner, Alberta. Taking out his pipe, lighting it and then crossing his knees holding his chin in his hands, posessing an air of supreme contentment, and with an intelligent face, he looked the man who could give some information. And he was just the man. He was a thresher and on his way to Milk River to secure some more help. He was requisitioned for information. "Yes, a good season, I've made a lot of money. As for bushels of wheat per acre on his five hundred acre farm; from 280 acres Roland got 65 bushels per acre; Bu- tiny electric lamp is flashed before gler had one hundred and ten acres that went 62 bushels; Carr had 65 bushels per acre off an eight hundred acre field." And he gave others running from 58 to 66 bushels per acre. All these people lived east of Warner, Alberta. Looking out of the window and seeing immense fields, still covered with stocks he was naked why they were not threshed, he replied that there were not enough "rigs" in the district, and that they would not get through before Christ-

An American writing of a trip he made through Western Canada says: "I went as far west as Saskatoon, back to Regina, Moose Jaw, and down on the Soo line, and I must say that I never saw such crops, or ever heard anything to compare with it in any country on earth. The country is over the hill, and certainly the farmers have a lot to be thankful for. There are very few of them that have done their work and done it properly but what have their debts paid and have bank accounts left."

And he only traveled the skirt of the country. The same story could be written of any part of any of three Provinces.-Advertisement.

GOT IDEA FROM SUBMARINE

Inventor of the Microphone Tells How He Came to Think About the Scheme.

In the Popular Science Monthly and World's Advance, William Dubilier, the American electrical engineer who was called to Europe by one of the allied governments to devise a system of harbor defense against hostile submarines, describes the experiments which led to the adoption of a remark-

able microphone submarine detector. Although it is impossible to see a deeply submerged submarine, Mr. Du dulity, but when yields, in whole town-biller believed that there was a method ships extending into districts covering of detecting its exact location in the water. In describing his experiments,

"Suppose that a submarine gave forth a sound of some kind, would it not be possible to devise some form heard? That was the starting idea of the experiments that I conducted for

"At once the beating of the propel lers of a submarine suggests itself. It is not characteristic enough. Motor boats, steamships and other power driven vessels have propellers, and al-though their period of vibration is different from that of any other engine driven craft, some other sound must ness of the story was doubtful and be sought-something as distinctive very little was sald of them. But as the call of a robin or the neighing of a horse, something that by no posstance, but in several, not in one lo- sible chance can be mistaken for an-

"I found what I sought in the weird shrill hum of a submarine. Others had in which the average was over fifty | heard the hum long before I began my experiments. It was taken for engine vibration. But it is much too high in pitch for that, as I found by actual tests.

"I soon convinced myself that the fine, shrill, almost singing note that and the average of the wheat threshed | can be heard when the Diesel engines was fifty-three bushels to the acre. So are cut off and the submarine is traveling under power derived from her storage batteries is due entirely to her electric motors. The sound is unmistakable. Step into any central station where electric power is generated to light a city and you will hear the hum of a submarine. There is no difference to the ear. To devise a means of detecting this sound at great distances was the object of my experimenting.

"The microphone at once suggested itself as a suitable instrument, and with its use, a submarine could be heard at a distance of fifty miles."

The printed injunction: "Don't jiggle the hook," is seen in conspicuous places all over New York city, having been placed by the telephone company in order that its patrons may learn that the way to get the best telephone service out of the system is to be sane and gentle with the apparatus. There are people who do not know that if "central" does not respond promptly yields, let's see," and then he began and properly the way to attract her atto string them off. "Peterson had 63 tention is to move the receiver hook up and down slowly, very slowly. If such is the hurried one's conduct a the face of the operator. If the hook is jiggled rapidly there is no lamp lighted at all and the operator goes about her work serenely indifferent to the perturbed state of the person at the other end of the wire. By seeing woman at a telephone when she is in a hurry-and at other times, tooher character. The querulous, cranky woman flying to pieces at the phone is frequently seen. She should have "Don't jiggle the hook" framed over the telephone stand.

Hats as Peace Tokens.

Here is a beautiful hospital story recorded by Rev. William Sellers in his new book, "With Our Fighting A colonel's wife was making noticed a wounded soldier toying with a German helmet.

"Well," the said to the soldier, "I suppose that means that you killed

"Well, naw," quietly responded the soldier. "You see it was like this: He lay on the field pretty near me with an awfu' bad wound and bleedin away somethin' terrible. I was losin a lot of blood, too, fre my leg, but I managed to crawl up to him and bound him up as well as I could, and he did the same for me. Nawthin' of coorse was said between us. I knew no German and the ither man not a word o English, so when he'd done, not seein hoo else tae thank him, I just smiled, and by way of token handed him my Glengarry, and he smiled back and give me his helmet."-Youth's Com-

Framing a Children's Code. The Missouri children's code co mission appointed by Governor Major has organized its work of codifying all children's laws in the state, and of drafting needed new laws to be introduced in the legislature of 1917. Most of the work will be done at the state university through the departments of law, sociology and political science. The entire commission of 21 members has been divided into subcommittees to handle various sections of the com prehensive outline of work, modeled the general outline sent out by the federal children's bureau. Considerable help is expected from the data the latter is collecting on children's laws throughout the United States. The expenses of the commission will he met by voluntary contributions Rhodes E. Cave, judge of the St. Louis juvenile court, is chairman, and Prof. Manley O. Hudson, of the state uni versity, secretary.

Compelled to Be Useful. "Does your wife allow you to smoke

around the house?" "She requires me to do so," replied Mr. Meekton. "I don't like tobacco myself; but Henrietta requires me to blow smoke on the houseplants twice a day to keep the insects off."

"Who is the man whose automobile wakes everybody on the block up when he comes home at midnight?" "I'm not sure. But I think he's the one who had a man arrested for keeping a bantam rooster that crowed at daybreak.
